**Subject:** RE: USS Lead - stuff to do

Michael and Tom: We received all of Chemours Zone 3 data yesterday, and we still do not have all of EPA's data from CLP for the samples we collected from Zone 3 this spring. We are expecting the last sets very soon. Also, we learned this this afternoon that the CLP lab EDDs do not include sample IDs; we have inquiries in through CLP to see if we can get that corrected. We still need to have a chemist look at all of our data and all of Chemours data to give it a project level data validation. We will apply the same XRF correction equation to Zone 3 that we applied to Zone 1 (the linear regression included data from both zones). We have not conducted any sampling in Zone 2 since the RI, and I don't think Chemours has either, so there is very little data from Zone 2, and it's all from the RI.

A couple of outstanding items are on my mind:

1. First, we need to finalize the remainder of the Zone 1 designs. We have 13 final designs for high priority properties, we have "draft final" designs for the 118 that we submitted on July 12, but we need final designs with action numbers for the remaining 113 properties in Zone 1.
2. We have not yet sent letters reporting sampling results to residents of the top floor of the Y-shaped buildings at the public housing complex. We have letters ready for signature, but have not sent them.
3. Michael and I received an e-mail from Weaver Boos on July 20 inquiring about the status of several requests for data that they sent at the end of June. I don't know whether EPA responded to that inquiry, but I did not.
4. Don Bruce and Philippa Conner called me yesterday requesting video of the work we are doing at Jacobsville. We provided the video yesterday and I have not heard back whether it was sufficient or whether video of additional aspects of the work is desired. There was a request for a video showing us wetting the soil for dust control, but mother nature has been taking care of that since we resumed work in Evansville last Thursday.

A soon as we get an official COR, I would like to discuss the status of these and other items.

Thanks,  
Rik

I don't think so. I am also not sure how much of the Zone 3 data is final. I think that a lot is, but I don't recall. Rik?

So, do we have redacted tables for zone 2 and 3 or does that need to be done?

That was the intent of the table. I have not reviewed it to see if it adequately redacts the PII. I believe that it only covers Zone 1.

Michael – is this a table we can send out for the FIOA request? The requestor wants sampling data from the complex.

Can you guys give me a quick checkin on these tasks?

Alex,

You did a great job with the letters on Friday. I appreciate you guys who stayed late so that we could get out a significant number of letters.

Here are our immediate things to do:

- On Monday, could you finish printing out the letters and bring them by EPA offices for me to sign them?
- You guys are working on a cost estimate for doing an industrial level cleanup of the property. (including demo of the buildings as a separate line item). What is the ETA for this?
- Table of data that Jackie is doing. I need that one tomorrow.
- I also need a redacted version of the Action number data table for Zone 1. Just use the June 21 table, minus dates, and some code to substitute for the addresses.

Thanks Alex and keep up the good work.

Michael
